PROJECTS

Quicklist.com

Front-End real estate website built using React and Sass. Features aesthetic user interface which dynamically renders to reflect content filters. Includes search, bed/bath, location, property type, floor space, and price filters, as well as checkbox filters for additional features.

Snapshot

Social media application featuring CRUD functionality and user authentication. Built in VEMN Stack (Vue, Express, mongoDB, and Node). Application features image capture built in Vue. App styled with Sass. Based off Instagram.

RESTaurant

Inventory management application designed for restaurants built with HTML, CSS, Bootstrap, JavaScript, Express, mongoDB, and Node. Application features authentication and CRUD functionality. Developed in a team of four in three business days for General Assembly utilizing agile development (Scrum, ZenHub).
